- V. Water Quality and Environmental Processes
- VI. Urban Water Networks
- VII. Agricultural Water Management
- VIII. Groundwater Hydrology and Contamination
- IX. Legislation and Policies

Duration of presentations

Oral presentations: 12 min - Discussion/questions: 12 min - 18 min

Conferences and Sessions

I. Advances in Hydrological Processes

- Surface hydrology
- Floods
- Urban drainage

II. Climate and Water Resources

- Climate change
- Time series analysis
- Global climate observations
- Climate and land use changes

III. Water Resources Management

- Managing water systems
- Dams and Reservoirs
- Virtual water and footprint

IV. Droughts and Water Scarcity

- Droughts
- Aridity and Desertification

V. Water Quality and Environmental Processes

- Water quality
- Water pollution
- Ecosystem management
- Water and wastewater treatment and reuse
- Desalination

VI. Urban Water Networks

- System hydraulic analysis
- Water loss management
